New Venus Industries

Our Product

Range

## Electrochemical Cell

Model EC-01

A versatile cell for general electrochemical analysis, featuring high chemical resistance and compatibility with various electrode setups.

## Flat Corrosion Cell – Acrylic

Model FCC-A01

Designed for corrosion studies on flat samples, with a durable acrylic body for clear observation and excellent sealing.

## Flat Corrosion Cell – Glass

Model FCC-G01

Ideal for aggressive chemical environments, this glass cell provides superior resistance for precise corrosion measurements.

## Microbial Fuel Cell (MFC)

Model MFC-01

A specialized dual-chamber cell for microbial electrochemistry and bio-energy research, facilitating anode and cathode separation.
