

New Venus Industries

Customized Scientific Laboratory Glassware & Instruments Since 1977

Features & Capabilities

Precision Manufacturing

With decades of experience since 1977, we utilize state-of-the-art technology to produce glassware and instruments with the highest degree of precision.

Customization Expertise

We specialize in creating custom-designed glassware and instruments tailored to your specific research and experimental needs. Your vision, our expertise.

Scientific Accuracy

Our products are manufactured to meet rigorous scientific standards, ensuring reliable and repeatable results for all your laboratory applications.

Our Product Categories

Electrochemical Cells

High-performance cells for a wide range of electrochemical research and analysis applications.

Petroleum Testing Glassware

Durable and precise glassware designed for ASTM standards in petroleum testing laboratories.

McLeod Gauges

Accurate and reliable gauges for measuring low pressures in vacuum systems, available in various ranges.

U-Tube Manometers

Dew Point Apparatus

Our Product Categories

Orsat Apparatus

Precision-designed Orsat Apparatus for accurate and reliable flue gas analysis in laboratory and industrial applications.

Oxygen Purity Apparatus

High-accuracy Oxygen Purity Apparatus designed for reliable measurement of oxygen concentration in laboratory & industrial settings.

Consumable Laboratory Glasswares

Comprehensive range of consumable laboratory glassware and general instruments engineered for precise, reliable, and everyday scientific use.
